SUPPLEMENT TO

According to statements made by a member of an Argentine scientific expedition headed by Bruno Guth, the objective of this expedition is to study certain Antarctic territory in order to determine if there are minerals available there.

This expedition is particularly interested in locating minerals which are employed in the atomic field. It also expects to explore the feasibility of setting up radio communications equipment in that area.

25X1A

Comment. According to local press, this expedition headed by Guth left Buenos Aires for the Antarctic region in two Argentine Air Force planes on 3 January 1952.
